DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Group I: Claims 1-15, 18, 26-28 are drawn to timing alignment method of calculating the timing correction value from the timing of reception and transmitting the correction values to the transceiver for time alignment. The claims in this group are classified in class 370, subclass 503.

Group II: claims 19-22 are drawn to data and frame structure in a TDMA link. The claims in this group are classified in class 370, subclass 498.

The inventions are distinct, each from the other because of the following reasons:

1. Inventions of group 1 and group 2 are related as sub combinations disclosed as usable together in a single combination. The sub combinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of group 1 has separate utility such as synchronization and hence does not require the data frame structure as disclosed in group 2.

Group 2 has it's own utility of a data frame structure in a TDMA link and does not require the group 1. See MPEP § 806.05(d).

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2682

3. Because these inventions are distinct for the reasons given above and the search required for Group 1 is not required for Group 2, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. A telephone conversation with the attorney on record, Linda Alcorn [Reg.No. 39,588] on 11/12/02 did not result in election/restriction. The attorney requested that the office submit a written action of the election restriction. Affirmation of this election must be made by applicant in replying to this Office action.
